PRODUKTINFORMATIONEN

The Rain Bird nozzle holder, 1800 series, PA-8 S, is suitable for placing the Rain Bird 1800 nozzle, above ground, on a 1/2” male thread connection. Use of the nozzle holder eliminates the need for a pop-up sprinkler, but remains visible above ground. The nozzle holder has a male thread connection, onto which a Rain Bird nozzle can be screwed. On the other side, the holder has a ½“ female thread connection, into which a coupling with 1/2” male thread connection can be screwed. The separately available nozzles determine spray angle, range and water consumption.
