PRODUKTINFORMATIONEN

Introducing the must-have tool for all your PE pipe surface preparation needs: the manual scraper. This efficient and easy-to-use device is designed to remove mud and smooth out PE pipe surfaces, resulting in faster and better connections. Featuring a 4-edged blade, our manual scraper is the perfect tool for removing tough debris and preparing the surface for a clean cut. The lightweight design ensures that you can easily transport it to any job site, and its ergonomic handle provides a comfortable grip, allowing you to work for extended periods of time without any discomfort. Our manual scraper is built to last, with high-quality materials that are resistant to wear and tear. Whether you're working on a large-scale construction project or a small repair job, our scraper is the ideal tool for achieving a smooth, clean surface that ensures a secure connection. At Bosta/Bevo, we are committed to providing our customers with high-quality products that are designed to improve their efficiency and productivity. Order your manual scraper today and experience the difference it can make in your work.
